

Dave Broering has spent his entire professional career [25yrs of experience] in the logistics industry. Through that time, he has developed an expertise in creating fast-growing and efficient operations focused on world class account management and execution of services. Dave began his career in Logistics with American Backhaulers, a privately held 3PL that was subsequently acquired by CH Robinson just two years into his career. In staying on with CH Robinson for 12 more years, Dave found a blend of technological focus and operational execution as a key to success inside this large publicly held 3PL.

Now, as President of Integrated Logistics Solutions at NFI, Dave leads the Freight Brokerage, Intermodal, Global Freight Forwarding, and 4PL services. With his team, he has fostered rapid growth across all four business units via both organic growth and acquisition. NFI is one of the largest privately held 3PL's in the US, focusing on Warehousing services, dedicated trucking, drayage and transloading services along with the Integrated Logistics services to the market.
